

# Anatomy of a Trigger Sprayer

## Below is a cross section of a Mixor<sup>®</sup> HP by Silgan

- Made in the USA
- High Output at 1.3cc & 1.6cc
- Ergonomic Design for Comfort
- Excellent Chemical Compatibility
- Low Force to Actuate
- Leakproof Venting System

## Multiple Nozzle Configurations

- Spray Only
- Spray/Stream
- Stream Only
- Foam
- Child-Resistant Nozzle

### NOTES ON DIP TUBES

The plastic tubing that attaches to the sprayer is the dip tube and should be long enough to reach the bottom of the bottle. Industry standard for dip tube measurement says to measure the dip tube from the bottom of the gasket (BOG) to the end of the tube. McKernan has the capabilities to rework the tubing on most sprayers to get the length needed for your product.
